

## Data Sheet

**PRODUCT NAME** *M. tuberculosis* Rv2628

**REPOSITORY REFERENCE** #100022

**DESCRIPTION** Hypothetical protein

**EXPRESSION SYSTEM** *E.Coli*

**PRESENTATION** 100 µg lyophilised

### **CHARACTERISATION**

Protein concentration determined by a Bradford-assay using BSA as reference protein. Expected protein size (SDS-PAGE + CBB). Western blotting with anti-HIS antibody pairs. Residual endotoxin levels (< 50 IU/mg). Potential non-specific inhibitory properties (*false negatives*) and non-specific stimulatory properties (*false positives*): Protein batches were subjected to a sensitive *in vitro* lymphocyte stimulation test (LST), and assayed for possible inhibition of PHA responses and for non-specific T cell stimulation using PBMC from PPD negative healthy bloodbank donors.

**PURIFICATION METHOD** Adapted from Franken *et al.* (2000) *Protein Expr. Purif.* 18: 95–99

**STORAGE** -20°C

**CONTRIBUTOR** Leiden University Medical Centre, Albinusdreef 2, 2333ZA Leiden, The Netherlands.

### **ACKNOWLEDGEMENTS**
