Non WHO Reference Material
Thrombopoietin (Human rDNA derived)
NIBSC code: 03/124
Instructions for use
(Version 2.0, Dated 19/04/2013)

This material is not for in vitro diagnostic use.

1. INTENDED USE
As a reference standard for biological activity of Thrombopoietin.

2. CAUTION
This preparation is not for administration to humans or animals in the human food chain.
The preparation contains material of human origin, and either the final product or the source materials, from which it is derived, have been tested and found negative for HBsAg, anti-HIV and HCV RNA. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory’s safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.

3. UNITAGE
The preparation coded 03/124 containing human sequence recombinant Thrombopoietin (TPO) was found to possess TPO activity based on its ability to stimulate the proliferation of the megakaryocytic cell line MO7e, and in a murine cell line transfected with the human mpl receptor 320/mpl+. This preparation is provided as a Reference Reagent for TPO bioassay, with an assigned potency of 5,000 Units per ampoule. It should be noted that this assigned potency is arbitrary, and does not reflect any pre-existing units for TPO activity, and it does not establish continuity with any pre-existing in-house standards. Users of the material should also note that the preparation 03/124 may be suitable to serve as a standard for the bioassay of TPO using assay methods based on other biological activities of TPO, but such applications have not been demonstrated for 03/124, and would require appropriate validation. Users who have data supporting the use of this preparation in another biological assay are encouraged to contact NIBSC.

4. CONTENTS
Country of origin of biological material: United Kingdom.
Each ampoule contains the residue after freeze-drying of 1.0 ml of a solution comprising:

- TPO approximately 500 nanograms
- 9.0 mg Sodium Chloride
- 1.0 mg Trehalose
- 2.0 mg Human Serum Albumin
- 0.1 microlitre Tween 20

The TPO protein was expressed in Chinese hamster ovary (CHO) cells.

5. STORAGE
For economy in use, it is recommended that the solution be sub divided into several small aliquots and stored at -40ºC or below. The preparation should not be subjected to repeated thawing/freezing. Unopened ampoules should be stored at -20ºC.
Please note: because of the inherent stability of lyophilized material, NIBSC may ship these materials at ambient temperature.

6. DIRECTIONS FOR OPENING
DIN ampoules have an ‘easy-open’ coloured stress point, where the narrow ampoule stem joins the wider ampoule body. Various types of ampoule breaker are available commercially. To open the ampoule, tap the ampoule gently to collect material at the bottom (labelled) end and follow manufactures instructions provided with the ampoule breaker.

7. USE OF MATERIAL
No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution.
Dissolve the total contents of the ampoule in 1.0 ml of sterile distilled water.
This solution will contain TPO at a concentration of 5,000 Units/ml. Use carrier protein where extensive dilution is required.

8. STABILITY
Reference materials are held at NIBSC within assured, temperature-controlled storage facilities and they should be stored on receipt as indicated on the label. Accelerated degradation studies have indicated that this material is suitably stable, when stored at -20ºC or below, for the assigned values to remain valid until the material is withdrawn or replaced. These studies have also shown that the material is suitably stable for shipment at ambient temperature without any effect on the assigned values. Once reconstituted, diluted or aliquoted, users should determine the stability of the material according to their own method of preparation, storage and use. Users who have data supporting any deterioration in the characteristics of any reference preparation are encouraged to contact NIBSC.

9. REFERENCES
The standard was produced under WHO guidelines cited in the WHO Technical Reports Series, No.927, 2005

10. ACKNOWLEDGEMENTS
N/A

12. CUSTOMER FEEDBACK
Customers are encouraged to provide feedback on the suitability or use of the material provided or other aspects of our service. Please send any comments to enquiries@nibsc.org

13. CITATION
In all publications, including data sheets, in which this material is referenced, it is important that the preparation's title, its status, the NIBSC code number, and the name and address of NIBSC are cited and cited correctly.

14. MATERIAL SAFETY SHEET
Classification in accordance with Directive 2000/54/EC, Regulation (EC) No 1272/2008: Not applicable or not classified

### Suggested First Aid

- **Inhalation:** Seek medical advice
- **Ingestion:** Seek medical advice
- **Contact with eyes:** Wash with copious amounts of water. Seek medical advice
- **Contact with skin:** Wash thoroughly with water.

### Action on Spillage and Method of Disposal

Spillage of contents should be taken up with absorbent material wetted with an appropriate disinfectant. Rinse area with an appropriate disinfectant followed by water. Absorbent materials used to treat spillage should be treated as biological waste.

### 15. LIABILITY AND LOSS

In the event that this document is translated into another language, the English language version shall prevail in the event of any inconsistencies between the documents.

Unless expressly stated otherwise by NIBSC, NIBSC’s Standard Terms and Conditions for the Supply of Materials (available at http://www.nibsc.org/About_Us/Terms_and_Conditions.aspx or upon request by the Recipient) (“Conditions”) apply to the exclusion of all other terms and are hereby incorporated into this document by reference. The Recipient’s attention is drawn in particular to the provisions of clause 11 of the Conditions.

### 16. INFORMATION FOR CUSTOMS USE ONLY

- **Country of origin for customs purposes**: United Kingdom
  - Defined as the country where the goods have been produced and/or sufficiently processed to be classed as originating from the country of supply, for example a change of state such as freeze-drying.
- **Net weight**: 4.6g
- **Toxicity Statement**: Toxicity not assessed
- **Veterinary certificate or other statement if applicable**: Attached: No
