WHO Reference Reagent
The 1st WHO Reference Reagent for BCG vaccine of Tokyo 172 sub-strain
NIBSC code: 07/272
Instructions for use
(Version 4.0, Dated 22/04/2013)

1. INTENDED USE
This material was prepared by the Japan BCG Laboratory, Tokyo, Japan in 2006. It was established as the 1st WHO Reference Reagent for BCG vaccine of Tokyo 172 in 2009. The intended uses of this material are as a comparator or reference for validity and consistency monitoring in viability assays (such as cultural viable count and modified ATP assays); for identity assay using molecular biology techniques; and for in vivo assays (such as absence of virulent mycobacteria, dermal reactivity and protection assays) used in pre-clinical studies for the evaluation of new tuberculosis vaccines.

2. CAUTION
This preparation is not for administration to humans or animals in the human food chain.

The material is not of human or bovine origin. This material contains live bacteria of a vaccine strain and is of category II classification. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory’s safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.

3. UNITAGE
There are 49.4 million cultural particles with a standard deviation of 5.9; and 217.6 ng ATP with a standard deviation of 27.5 per ampoule as estimated from a collaborative study (see reference in section 5).

4. CONTENTS
Country of origin of biological material: Japan.
This Reference Reagent was prepared from a culture of Tokyo 172 BCG sub-strain in Sauton medium, supplied and manufactured by the Japan BCG Laboratory. Each ampoule contains 1 mg moist bacillary mass and 3 mg monosodium L-glutamate before lyophilisation.

5. STORAGE
This preparation should be stored at -20ºC for long-term storage to preserve viability and protected from direct sun light.

6. DIRECTIONS FOR OPENING
Tap the ampoule gently to collect the material at the bottom (labelled) end. Ensure ampoule is scored all round at the narrow part of the neck, with a diamond or tungsten carbide tipped glass knife file or other suitable implement before attempting to open. Place the ampoule in the ampoule opener, positioning the score at position ‘A’; shown in the diagram below. Surround the ampoule with cloth or layers of tissue paper. Grip the ampoule and holder in the hand and squeeze at point ‘B’. The ampoule will snap open. Take care to avoid cuts and projectile glass fragments that enter eyes. Take care that no material is lost from the ampoule and that no glass falls into the ampoule.

Side view of ampoule opening device containing an ampoule positioned ready to open. ‘A’ is the score mark and ‘B’ the point of applied pressure.

7. USE OF MATERIAL
No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution.

The content of the ampoule can be reconstituted in sterile deionised water or appropriate buffer. The reconstituted preparation should be used immediately or stored at 4ºC up to 6 hours.

8. STABILITY
Reference materials are held at NIBSC within assured, temperature-controlled storage facilities. Reference Materials should be stored on receipt as indicated on the label or in Instruction for Use.

NIBSC follows the policy of WHO with respect to its reference materials. The viability of this preparation is assessed annually to ensure the unitage in terms of number of cultural particles is maintained at acceptable range. Users who have data supporting any deterioration in the characteristics of this Reference Reagent are encouraged to contact NIBSC.

9. REFERENCES

10. ACKNOWLEDGEMENTS
Special thanks are due to the Japan BCG Laboratory for donating ampoule-filled lyophilised preparation of BCG vaccine, Tokyo 172 sub-strain, for the establishment of this Reference Reagent.

11. FURTHER INFORMATION
Further information can be obtained as follows;

12. CUSTOMER FEEDBACK
Customers are encouraged to provide feedback on the suitability or use of the material provided or other aspects of our service. Please send any comments to enquiries@nibsc.org
13. CITATION
In all publications, including data sheets, in which this material is referenced, it is important that the preparation's title, its status, the NIBSC code number, and the name and address of NIBSC are cited and cited correctly.

14. MATERIAL SAFETY SHEET
Classification in accordance with Directive 2000/54/EC, Regulation (EC) No 1272/2008: Not applicable or not classified

Suggested First Aid
- Inhalation: Seek medical advice
- Ingestion: Seek medical advice
- Contact with eyes: Wash with copious amounts of water. Seek medical advice
- Contact with skin: Wash thoroughly with water.

Action on Spillage and Method of Disposal
- Spillage of contents should be removed with absorbent material wetted with an appropriate disinfectant. Rinse area with an appropriate disinfectant followed by water.
- Absorbent materials used to treat spillage should be treated as biological waste.

15. LIABILITY AND LOSS
In the event that this document is translated into another language, the English language version shall prevail in the event of any inconsistencies between the documents. Unless expressly stated otherwise by NIBSC, NIBSC’s Standard Terms and Conditions for the Supply of Materials (available at http://www.nibsc.org/About_Us/Terms_and_Conditions.aspx or upon request by the Recipient) (“Conditions”) apply to the exclusion of all other terms and are hereby incorporated into this document by reference. The Recipient’s attention is drawn in particular to the provisions of clause 11 of the Conditions.

16. INFORMATION FOR CUSTOMS USE ONLY
Country of origin for customs purposes*: Japan
* Defined as the country where the goods have been produced and/or sufficiently processed to be classed as originating from the country of supply, for example a change of state such as freeze-drying.
Net weight: 4 mg
Toxicity Statement: Toxicity not assessed
Veterinary certificate or other statement if applicable.
Attached: No

17. CERTIFICATE OF ANALYSIS
NIBSC does not provide a Certificate of Analysis for WHO Biological Reference Materials because they are internationally recognised primary reference materials fully described in the instructions for use. The reference materials are established according to the WHO Recommendations for the preparation, characterization and establishment of international and other biological reference standards http://www.who.int/bloodproducts/publications/TRS932Annex2_Inter_biol refstandardsrev2004.pdf (revised 2004). They are officially endorsed by the WHO Expert Committee on Biological Standardization (ECBS) based on the report of the international collaborative study which established their suitability for the intended use.
