WHO International Standard
1st WHO International Standard for SARS-CoV-2 antigen
NIBSC code: 21/368
Instructions for use
(Version 1.0, Dated 01/11/2022)

§

1. INTENDED USE
This preparation contains 0.01% formaldehyde-inactivated SARS-CoV-2 Omicron (B.1.1.529, sub-variant BA.1). The reference is intended for the standardization, and evaluation of performance and sensitivity of SARS-CoV-2 antigen detection as well as for the calibration of secondary reference materials.

2. CAUTION
The material is not of human or bovine origin. This preparation is not for administration to humans or animals.

3. UNITAGE
This material has an assigned unitage of 5000 International Units of SARS-CoV-2 antigen per ampoule.

4. CONTENTS
Country of origin of biological material: United Kingdom. Each ampoule is a lyophilate of a preparation that contained 0.25 mL of clarified SARS-CoV-2 culture supernatant of Omicron (B.1.1.529, sub-variant BA.1), inactivated with 0.01% formaldehyde and diluted ~1/15 in Copan Universal Transport Medium (UTM-RT).

5. STORAGE
This preparation should be stored at -20°C or below on receipt. Please note because of the inherent stability of lyophilized material, NIBSC may ship these materials at ambient temperature.

6. DIRECTIONS FOR OPENING
DIN ampoules have an 'easy-open' coloured stress point, where the narrow ampoule stem joins the wider ampoule body. Various types of ampoule breaker are available commercially. To open the ampoule, tap the ampoule gently to collect the narrow ampoule stem joins the wider ampoule body. Various types of ampoule breaker are available commercially. To open the ampoule, ampoule breaker. Various types of ampoule breaker are available commercially. To open the ampoule, ampoule breaker.

7. USE OF MATERIAL
No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution. This material is supplied lyophilized and before use should be reconstituted in 0.25 mL of ultra-pure water. Reconstituted material should be used on the day of reconstitution.

8. STABILITY
Reference materials are held at NIBSC within assured, temperature-controlled storage facilities. Reference Materials should be stored on receipt as indicated on the label.

NIBSC follows the policy of WHO with respect to its reference materials.

9. REFERENCES

10. ACKNOWLEDGEMENTS
We gratefully acknowledge the important contributions of the collaborative study participants. Funding for the development of this standard was provided by the WHO Health Emergencies Programme.

11. FURTHER INFORMATION
Further information can be obtained as follows; This material: enquiries@nibsc.org

12. CUSTOMER FEEDBACK
Customers are encouraged to provide feedback on the suitability or use of the material provided or other aspects of our service. Please send any comments to enquiries@nibsc.org

13. CITATION
In all publications, including data sheets, in which this material is referenced, it is important that the preparation’s title, its status, the NIBSC code number, and the name and address of NIBSC are cited and cited correctly.

14. MATERIAL SAFETY SHEET
Classification in accordance with Directive 2000/54/EC, Regulation (EC) No 1272/2008: Not applicable or not classified

**Action on Spillage and Method of Disposal**
Spillage of ampoule contents should be taken up with absorbent material wetted with an appropriate disinfectant. Rinse area with an appropriate disinfectant followed by water. Absorbent materials used to treat spillage should be treated as biological waste.

15. **LIABILITY AND LOSS**
In the event that this document is translated into another language, the English language version shall prevail in the event of any inconsistencies between the documents. Unless expressly stated otherwise by NIBSC, NIBSC’s Standard Terms and Conditions for the Supply of Materials (available at http://www.nibsc.org/About_Us/Terms_and_Conditions.aspx or upon request by the Recipient) (“Conditions”) apply to the exclusion of all other terms and are hereby incorporated into this document by reference. The Recipient’s attention is drawn in particular to the provisions of clause 11 of the Conditions.

16. **INFORMATION FOR CUSTOMS USE ONLY**
Country of origin for customs purposes*: United Kingdom
* Defined as the country where the goods have been produced and/or sufficiently processed to be classed as originating from the country of supply, for example a change of state such as freeze-drying.

Net weight: 0.25g
Toxicity Statement: Non-toxic
Veterinary certificate or other statement if applicable. Attached: No

17. **CERTIFICATE OF ANALYSIS**
NIBSC does not provide a Certificate of Analysis for WHO Biological Reference Materials because they are internationally recognised primary reference materials fully described in the instructions for use. The reference materials are established according to the WHO Recommendations for the preparation, characterization and establishment of international and other biological reference standards http://www.who.int/bloodproducts/publications/TRS932Annex2_Inter_biolefstandardsrev2004.pdf (revised 2004). They are officially endorsed by the WHO Expert Committee on Biological Standardization (ECBS) based on the report of the international collaborative study which established their suitability for the intended use.
