This material is not for in vitro diagnostic use

## 1. INTENDED USE

The intended use for this reagent is to be negative for blood markers as well as SARS-CoV-2 antibodies.

## 2. CAUTION

**This preparation is not for administration to humans or animals in the human food chain.**

25/B950 has been prepared from a pool defibrinated plasma donations, repeatedly unreactive in commercial EIA kits. These samples were non-reactive for HBsAg, anti-HCV and anti-HIV1/2, Anti-HTLV and Anti-Syphilis using commercial EIA kits. Bronidox® was added to a concentration of 0.05%(w/v) as a preservative. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory's safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.
