Non WHO Reference Material
Human Anti GM-CSF Plasma
NIBSC code: 97/538

Instructions for use
(Version 5.0, Dated 01/02/2008)

This material is not for in vitro diagnostic use.

1. INTENDED USE
This material is intended for use as an internal control in assays for detection of neutralizing antibodies to human GM-CSF in serum/plasma.

2. CAUTION
This preparation is not for administration to humans or animals in the human food chain.

The preparation contains material of human origin, and either the final product or the source materials, from which it is derived, have been tested and found negative for HBsAg, anti-HIV and HCV RNA. As with all materials of biological origin, this preparation should be regarded as potentially hazardous to health. It should be used and discarded according to your own laboratory's safety procedures. Such safety procedures should include the wearing of protective gloves and avoiding the generation of aerosols. Care should be exercised in opening ampoules or vials, to avoid cuts.

3. UNTAGE
The following information is provided as a guide, based on bioassays performed at NIBSC. After reconstitution, a 1/50 dilution of the vial contents completely neutralised at least 5 IU/ml of the International Standard for GM-CSF (88/646) in a bioassay using the TF-1 cell line.

4. CONTENTS
Country of origin of biological material: United Kingdom. The Plasma in this vial was obtained from a patient with Myasthenia Gravis like symptoms. Each vial contains the residue after freeze drying of 0.5 ml of human plasma diluted 1 in 4 with phosphate buffered saline, pH 7.0.

5. STORAGE
Dilutions should be made in a protein-containing medium. Vials should be stored at -20ºC and when reconstituted in aliquots at -40ºC or below. The vials do not contain bacteriostat and solutions of the preparation should not be assumed to be sterile.

Please note: because of the inherent stability of lyophilized material, NIBSC may ship these materials at ambient temperature.

6. DIRECTIONS FOR OPENING
Vials have a 'flip-up' circular cap. Either on the cap or the collar of the vial, there is an indication of the point at which to lever off the cap. This exposes an area of the stopper through which reconstitution and withdrawal of the preparation can be made using a hypodermic needle and syringe. If use of a pipette is preferred, then fully remove the metal collar using, for example, forceps, taking care to avoid cuts by wearing appropriate gloves. Remove the stopper for access. Care should be taken to prevent loss of the contents.

7. USE OF MATERIAL
No attempt should be made to weigh out any portion of the freeze-dried material prior to reconstitution
Reconstitute the vial with 0.5 ml of sterile distilled water. After reconstitution, the solution should be treated as a 1 in 4 dilution of whole plasma.

8. STABILITY
Reference materials are held at NIBSC within assured, temperature-controlled storage facilities. Reference Materials should be stored on receipt as indicated on the label.

NIBSC follows the policy of WHO with respect to its reference materials.

12. CUSTOMER FEEDBACK
Customers are encouraged to provide feedback on the suitability or use of the material provided or other aspects of our service. Please send any comments to enquiries@nibsc.org

13. CITATION
In all publications, including data sheets, in which this material is referenced, it is important that the preparation's title, its status, the NIBSC code number, and the name and address of NIBSC are cited and cited correctly.

14. MATERIAL SAFETY SHEET
Classification in accordance with Directive 2000/54/EC, Regulation (EC) No 1272/2008: Not applicable or not classified

**Action on Spillage and Method of Disposal**

Spillage of ampoule contents should be taken up with absorbent material wetted with an appropriate disinfectant. Rinse area with an appropriate disinfectant followed by water. Absorbent materials used to treat spillage should be treated as biological waste.

15. **LIABILITY AND LOSS**

In the event that this document is translated into another language, the English language version shall prevail in the event of any inconsistencies between the documents.

Unless expressly stated otherwise by NIBSC, NIBSC’s Standard Terms and Conditions for the Supply of Materials (available at http://www.nibsc.org/About_Us/Terms_and_Conditions.aspx or upon request by the Recipient) (“Conditions”) apply to the exclusion of all other terms and are hereby incorporated into this document by reference. The Recipient’s attention is drawn in particular to the provisions of clause 11 of the Conditions.
